

Quality products to keep the **engine room running**

The premium standard in reliable spare parts, ensuring maximum vessel performance.

Laudat Supply, S.L. keeps vessels moving by supplying the parts their engine rooms depend on. Our core focus is propulsion and auxiliary machinery, alongside a broader range of shipboard equipment and technical provisions — from new-build systems to hard-to-find parts for older machinery.

Whether you need genuine, manufacturer-branded parts or OEM parts built to exact original specification, we help you choose the right option — protecting your budget without compromising reliability or the trust your technical team places in what goes on board.

Based in Madrid, we work from one of the best-connected logistics hubs in Europe. Madrid-Barajas' extensive air freight network, combined with top-tier carriers, means fast preparation, smooth customs clearance, and reliable transit — wherever the vessel needs the part to arrive.

SCOPE OF SUPPLY

PROPULSION ENGINES & GENSETS
